

FutureCRM – Design Rationale

This project is a web-based CRM (Customer Relationship Management) dashboard designed for small agencies and growing businesses to manage leads, clients, tasks, and sales pipelines efficiently. The interface was created with a clean and modern SaaS-style UI focusing on usability, workflow clarity, and simplicity.

Project Objective

The goal of this CRM dashboard is to help agencies track leads, monitor sales pipelines, manage clients, organize tasks, and improve productivity through a centralized dashboard experience.

Target Users

- Small digital agencies
- Freelancers managing multiple clients
- Startup sales teams
- SaaS consulting businesses

Design Approach

The UI was designed using a minimal and modern layout with soft green accents to create a professional business appearance. The design focuses on readability, clear spacing, simple navigation, and consistent component styling across all pages.

Workflow Structure

The workflow of the CRM follows a practical business process:

Login / Signup → Dashboard → Leads → Pipelines → Clients → Tasks

This structure helps users navigate naturally through lead management, sales tracking, client handling, and task organization.

Pages Included

Login Page

A clean authentication screen with email and password fields designed for easy user access.

Signup Page

Allows new users to create accounts with a professional and simple onboarding experience.

Dashboard

Provides a quick overview of business performance including revenue, leads, deals, graphs, and recent activity.

Leads Page

Displays lead information in a structured table layout for easy tracking and management.

Clients Page

Uses a card-based layout to present client details, revenue, renewal dates, and status information.

Tasks Page

Designed in Kanban-style columns to help teams organize pending, completed, upcoming, and overdue tasks.

Pipeline Page

Shows sales stages visually using pipeline cards, funnel analytics, revenue graphs, and recent deals.

UI/UX Decisions

- Consistent sidebar navigation across all pages
- Reusable card components for scalability
- Minimal color palette for a clean SaaS appearance
- Different layouts used across pages to avoid repetitive design
- Dashboard graphs added for data visualization and quick business insights
- Kanban task management improves workflow organization
- Pipeline analytics help visualize sales conversion stages

Color Palette

Primary Color: Dark Green (#065F46)

Secondary Accent: Light Green (#DCFCE7)

Background: White / Light Gray

Typography: Dark Gray / Black

Tools Used

- Figma – UI Design and Prototyping
- iCharts Plugin – Graph and chart generation
- Feather Icons – UI icons

Conclusion

This CRM dashboard project demonstrates modern UI/UX design principles used in real SaaS products. The project focuses on workflow-based design, clean user experience, scalable layouts, and professional business interfaces suitable for real-world CRM systems.
